

PetExec is packed with treats!

The PetExec team is proud of serving the pet professional community for eleven years and counting. Keep your pack on track with more ways to simplify and manage your guests.

We love bringing amazing new enhancements to keep our packmate customers organized and ready for action.

PetExec 3.3 New Features

- Beautiful new messaging options.
- Boarding enhancements to simplify your workflow.
- More logging and tracking of activities.
- Increased number of items viewable on calendar.

Directions: Select the service(s) and set the "Qty / Day" multiplier, number of pets and number of kennels used for that service. At least one kennel has to be selected with a quantity greater than 0. The total number of pets needs to match the total number chosen for this boarding. Number of pets is the number of pets in a kennel, so kennels set to 0 do not affect kennel count or have pets assigned. The following formula is used:

$$\text{price_of_service} * \text{quantity_per_day}$$
