

PetExec Mobile App

Requesting Various Services

Depending on company settings, the PetExec Mobile app provides a native solution to the web-based portal. Most actions are self-explanatory.

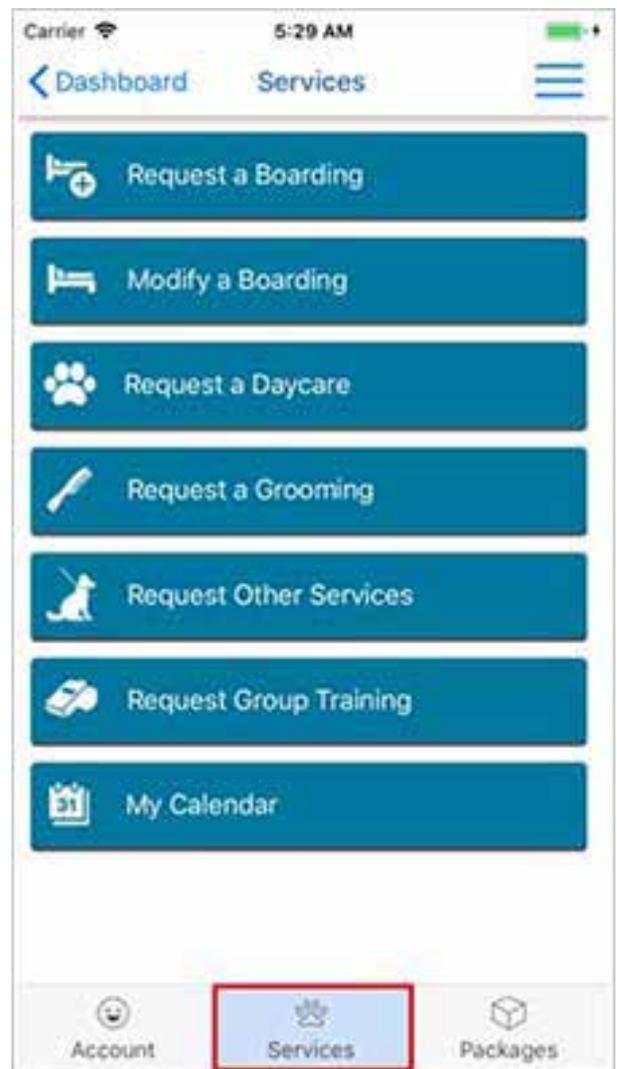

If any content listed here doesn't exist in your app, contact the company you are logged into and ask if they will enable some of these features. The PetExec Mobile app is separated into three sections:

- Account
- Services
- Packages

Once your initial owner information is set up, most of your interactions with the app will be to request various services.

After selecting Services, your request will follow a similar process:

- Select your pet(s)
- Select your date(s)
- Select a type of service(s)
- Submit your request

Request and Schedule a Boarding

Select Request a Boarding. Select your pet(s). Set the start and end dates of the boarding. Optionally, select your drop-off and pickup time. Submit by tapping Request Boarding button.

Depending on the preset petcare company preferences, there are two ways of selecting a boarding.

Option "A" is drop-down menu containing a list of boarding services and the number of rooms needed.

Option "B" requires selecting one or more service. Specify the quantity per day and the number of pets associated with the selected service.

(Note: By default, the "QTY/Day" is set to "1" and is NOT the total number of days for the boarding, but the # per night.)
